Founded in Denmark in 1999 by Normann Copenhagen is an international traditions. Our continuously expanding lighting and home accessories is defined crafted with an emphasis

Since Normann Copenhagen's foundation in conventional thinking and make the ordinary By combining the craftsmanship, function our Danish design heritage with modern we aim to create original products in a the test

We believe in uniting people and spaces quality of people's lives through Our products combine functionality and of needs of modern life in residential We aspire to increasingly contribute to connect people by becoming one

Jan Andersen and Poul Madsen, design brand rooted in Danish design collection encompassing furniture, by clean lines with a playful twist and on quality and durability.

1999, our ambition has been to challenge extraordinary through great design. nality and endurance characterized by silhouettes and durable materials, contemporary design that withstand of time.

across the world and improving the the power of great design. design and accommodate the diversity and professional interiors alike. the making of meaningful spaces that of the global leaders in design.

OUR VALUES

Normann Copenhagen is a constellation of people, all of whom embody our core values of courage, quality and responsibility.

COURAGE

We are driven by creative curiosity, and we dare where others don't. Courage is a driver of change, and we are always looking to challenge conventional thinking through what we do and the way we do things.

QUALITY

We are passionate about ensuring a high quality in everything we do. We believe that good design is made to last, and we strive to create designs that are as relevant now as in the future.

RESPONSIBILITY

Our core value of responsibility is expressed through acting respectfully towards people, our surroundings and our future.

MADE WITH CARE

Allez Chair in Park Green with molded wicker seat

NORMANN COPENHAGEN & SUSTAINABILITY

At Normann Copenhagen, we aim to take responsibility for our operations throughout the value chain that affect the wellbeing of people and the environment. We're not perfect, but we constantly strive towards a more sustainable business model and are committed to contributing to a positive social impact while mitigating our impact on the environment. By using our core values courage, quality, and responsibility as guidance and holding ourselves accountable for the impact we have on future generations, our ambition is to challenge conventional thinking and explore innovative, circular modes of operation.

Bit Stool in Black Multi

RESPONSIBLE DESIGN

We believe that longevity and durability is at the core of sustainable design. By creating high quality products, we invite people from all over the world to bring the world famous Scandinavian design heritage and craftsmanship into their lives. Our products are made to last – whether they adorn grand hotels, cozy cafés or family homes.

SOURCING RESPONSIBLE MATERIALS

When developing a new design, our skilled team of in-house designers and engineers challenge existing ways of production and utility of materials in order to create products that are manufactured to last over generations. A large part of the design process consists of reflecting on materials, their quality, durability, origin, environmental impact and life cycle. Our sourcing team works hard to select the best materials from the best-in-class suppliers, and continuously strives to optimize our use of materials in order to minimize our environmental impact on our surroundings. We constantly seek new ways to introduce circular materials in our production.

CONSCIOUSLY COOPERATING

Our in-house design and product development team have spent years establishing close relationships with carefully selected suppliers. Over the years, we have built long-term relationships and established a dialogue based on trust and a shared responsibility. We regard our mission to become more sustainable as a collective responsibility between us and our suppliers. Together, we are working towards a more sustainable industry, striving to optimize our operations to become more responsible.

RESPONSIBLE PACKAGING

We're committed to ensuring that all our products are wrapped in responsible packaging that is safe for the product as well as the environment. We want to make sure your new Normann Copenhagen products arrive safely while also taking the environmental impact of our packaging into consideration. Therefore, the majority of our packaging is made from recycled materials and can be repurposed or recycled after use.

HEALTH, QUALITY AND SAFETY GUARANTEES

We are committed to ensuring that our products live up to our high quality standards. Through large scale test phases and certifications, we continuously improve and adjust our products before introducing them to the market. This is your guarantee that our products comply with the highest standards in quality and emission testing as well as load capacity. The EN strength and stability testing is the official European Standard testing that specifies requirements for the stability, strength and durability of all types of seating for adults, while the ANSI/BIFMA is the North American equivalent to the EN tests. During the testing, loads, forces and velocities are applied to the chairs, stimulating the normal functional use as well as misuse that might be expected to occur. These tests are your guarantee that our furniture is safe and durable.

Indoor air quality is highly important to your health and well-being, and we are committed to setting high standards for our furniture's part in creating healthy indoor environments. We test furniture emissions for selected products to ensure that our furniture contributes with a good air quality in indoor environments. These tests reveal that not only does our furniture comply with the standards set forth by the World Health Organization, the detected emissions are significantly lower than the recommendations. This is your guarantee that our furniture is a safe choice for a healthy indoor air environment. Discover all test reports in our online media bank.

REPURPOSING

ALLEZ CHAIRS

We're working on minimizing the unnecessary waste from our own production sites. Scrapped material from the production of our Allez Chairs is granulated, painted black and reused for the black version of the chair.

HIDE POUF

Hide Storage Pouf is made from 100% PET felt, which consists of post-consumer plastic bottles which are extruded into polyester fibers and then compressed, resulting in a soft felt fabric.

PLASTIC WASTE

POLLI RUG

Polli Rug is made from 100% recycled post-consumer PET yarn. The plastic waste is pre-processed into short textile fibers, which are spun into a fine yarn and woven into soft, ultra-durable Polli Rugs.

BIT STOOL

The Bit Stool is made from 100% recycled industrial and household plastic. The material is heated to an exact 120 C melting point, making it possible to repeatedly reuse and reheat the material without altering its properties, thus ensuring a circular life cycle.

Form Chair and Barstool in various combinations

Form Bar Chair 75 cm with Red steel legs and full upholstery

Form Chair in Black with Black steel legs

FORM

The Form Chair is an uncompromising design that combines a strong design idiom with comfortable curves and an innovative industrial technique. The sleek mounting solution developed especially for the Form Chair creates a natural integration between seat and base, making it possible to customize the chair with different types of bases to accommodate different settings.

Form is a contemporary shell chair made of molded plastic. The chair comes with or without armrests, as a barstool in two different heights, with different types of swivel bases and as a stacking chair.

The shells are all created of the highest quality recyclable polypropylene and have been molded using one single injection. That way you achieve an extremely strong construction with the finest and clearest surface possible. The wooden bases are assembled and sanded by hand after they are cut. The steel legs are produced in thick and strong steel pipe. The base is welded together by hand, making the use of screws unnecessary and the construction more durable.

Since the initial idea, it took three years to develop the Form series. During the process angles have been corrected, curves have been adjusted, colors have been tweaked and more than 20 prototypes with various angles and material thicknesses have been tested to find the right solutions and achieve the best comfort possible. The result is an uncompromising design, which blends craftsmanship with design history.

The molded shell is based on well thought out curves, which follow the body and ensure optimal sitting comfort. For example, the seat is wider to accommodate various body types. It also gives you room to change your position, so you sit comfortably for a longer period of time.

The goal was also to create a flexible design that could be adapted to countless types of bases, including the ones that will emerge in the future. The easiest and most common way to achieve this is by making several holes underneath the shell to fit the different bases. Form on the other hand, has raised the bar and prioritized exclusive and well-executed details. The connection principle developed especially for the Form Chair makes it possible to mount different types of bases in the same holes. As a result, Form is a homogenous and aesthetic design, and can be customized from more than 100,000 possible combinations of models, colors, textiles and bases, offering a wealth of opportunities for creative expression.

Herit Armchair in Dusty Green with smoked oak legs and upholstery

Herit Armchair in Sand with oak legs and upholstery

HERIT

Danish design traditions have left a clear mark on the Herit Chair, which is short for heritage. The series came to life from a desire to design a versatile and strong chair that unites the different eras of Danish design. Oak and polypropylene merge in tactful synergy to create a hard-wearing, maintenance-friendly and accessible design crafted for modern life.

CLASSIC MATERIALS MEET MODERN AESTHETICS

My Chair with chrome legs and full upholstery

MY CHAIR

Effortless and timeless, My Chair is the essence of a modern classic: A minimalistic chair in molded veneer that moves gently with the body. My Chair's curved waist and rounded corners counterbalance the stringent design of the chair and give it a warm and welcoming expression.

Studio Bar Chair 65 cm in oak
Studio Bar Armchair 75 cm in oak with front upholstery

Studio Armchair in oak with front upholstery

STUDIO

A design that attracts attention, but glows with pure simplicity. There is something virtually graphic about the way the slender steel frame grows out below the seat and back of the Studio Chair, framing the molded shell in an airy design. The flowing lines stand out in an eye-catching silhouette, like a line drawing or pictogram, just as the empty spaces between the frame and the back act to define the shape.

OFF CHAIR

UNITING COMFORT, FUNCTIONALITY AND AESTHETICS

Off Chair Low with cushion

Off Armchair Low Swivel with aluminum legs, five wheels and cushion

Off Armchair Low Swivel with aluminum legs, five wheels and cushion

Off Chair is crafted with a specific focus on catering to the need for aesthetic office environments while providing a highly functional and versatile task chair with a meticulous attention to detail and comfort. Off Chair provides all the classic functions of a task chair with essential technical elements such as gas lift and tilt functions beautifully integrated into the construction of the chair. The design offers immediate comfort, providing the ideal conditions for a good working posture throughout the day. Equally suitable for home offices and corporate workplaces, Off Chair is designed for environments where high sitting comfort, functionality and an aesthetic design are of great importance.

With specific attention to creating a timeless design, Off Chair's design idiom applies uncomplicated, straightforward silhouettes for a classic, ever-relevant design. Off Chair obtains its minimalist expression through its rectangular, yet slightly rounded frame. Soft upholstery complements the cool shine of the aluminum, presenting a contrasting, tactile expression. The high back is crafted with attention to providing optimal support for many hours by the desk and can be selected in either low or high versions for additional support.

The legs and armrests come in polished aluminum or black powder-coated aluminum, and the base is available as either a four-star fixed based or five wheels for extra mobility. The five wheel base offers the additional mobility of tilt and gas lift functions, providing extra flexibility. A subtle cover discreetly integrates the mechanical components beneath the seat – an innovative solution designed to expertly incorporate the technical components into the design. A small lever handle enables the tilt function to be either locked in a static position or unlocked for unrestricted tilt movement. Off is available with optional cushioned pads, which, in addition to their aesthetic appeal, serve to provide the design with further comfort. The seat and backrest come in either high or low in a wide selection of various fabrics and leathers, providing an array of color choices for personal customization. The possibility of choosing a chair with or without armrests allows for tailoring it to any specific need, taste or setting.

The versatile chair serves to unite form and function in a timeless design while catering to the needs of modern office spaces in residential, commercial and corporate settings.

Burra Lounge Chair

Burra Lounge Chair with return

BURRA

A visually characteristic design, the Burra collection demanded an equally characteristic name. Short for burrata, the round and famously soft Italian cheese, Burra invites you into its enveloping embrace with its exceptionally comfortable seat and pleasant aesthetic.

Burra Lounge Chair in various textiles

Burra Lounge Chair in various textiles

As implied by its name, the design is a study in softness. Distinguished by its accentuated round seat and enveloping back and armrest, the plump design offers meticulous seating comfort while the charismatic appearance makes a compelling impact in any setting.

Alongside the burrata-inspired seat, one of the Burra collection's main character traits is the distinctive, curved backrest that naturally evolves into armrests. Every element of the design alludes to its softness. Clad in full upholstery, the design idiom consists of rounded, organic lines that melt together. The result is a bold, sculptural design with its own unique expression. With unusually plump dimensions and a charismatic silhouette, the Burra Lounge Chair transcends traditional furniture, making it a statement piece that adds both functionality and artistic flair to any interior.

Designed to provide unparalleled relaxation, Burra is crafted using high-quality materials selected for their comfort and durability. To obtain the right amount of softness, the lounge chair is meticulously formed with additional foam for increased comfort. In addition, the design is fitted with a swivel base with an optional return function, ensuring full freedom of movement and additional mobility.

Touching upon the subject of the design process of Burra, designer Simon Legald says "When designing any chair, it's important to consider comfort and dimensions. I wanted to create a design that featured an interesting interplay between these two factors using simple, minimalistic lines. Another requirement was for the design to be a sculptural piece, allowing it to become the focal point in the interior. The result is a chair that expresses softness in every sense."

Also a part of the Burra family is the Burra Chair, a dining chair with the same remarkable characteristics and plump expression. The dining chair version features a slightly inclined backrest, providing the optimal shape to sit comfortably for hours on end.

The Burra family brings a tactful combination of playfulness and elegance to any dining or lounge area, and will infuse the space with visual softness, elevating the aesthetic appeal of professional and residential settings alike.

DRAPE

WELL-BALANCED AND UNCOMPROMISING COMFORT

Drape Lounge Chair presents an uncompromising design in which comfort and aesthetics go hand in hand. Distinguished by its organic design language, the comfortable seat is elegantly draped around the base of the chair, offering visual balance and unparalleled comfort. A celebration of minimalist lines and sublime craftsmanship, Drape is a modern lounge chair with visible references to the traditions of its Danish design heritage. Soft, rounded curves make Drape visually appealing while highlighting the extensive comfort of the chair. The characteristic draped shape serves more than just an aesthetic purpose: The wide armrests support numerous different seating positions, providing the conditions for a comfortable lounging experience for hours on end.

Drape's organic disposition is balanced by a slender, utilitarian base. Elegantly elevated around the base, the shell gradually evolves into armrests as a natural extension of the backrest. To accommodate the many preferences and settings of modern life, the versatile lounge chair is available in several different versions. Drape Lounge Chair High offers a higher backrest with an optional headrest for additional support. Crafted from long-lasting materials, the legs are made from either powder-coated steel or solid oak, while the shell itself is formed in rigid PU foam with a steel reinforcement structure inside. For the cushions, soft PU foam ensures additional comfort.

Available to tailor to any preference or setting, Drape can be upholstered in an extensive selection of textiles and leathers from Kvadrat, Camira and Sørensen Leather, each offering a broad spectrum of colors and nuances to choose between. As an added decorative detail, Drape can be customized with contrasting textiles and leathers for the piping and cushion upholstery.

Designed to last, the durable materials and timeless expression makes Drape a relevant furniture piece for many years to come. Crafted with a specific focus on creating a chair that would fit seamlessly into any lounge setting, the aesthetic lounge chair is perfect for lobbies and receptions as well as living rooms and cozy reading nooks. In total, Drape is a contemporary lounge chair with a soft, enveloping appeal expressed through its classic and timeless silhouette.

SUM
SWELL
FRAME

ARK

Subtle arches, plump cushions and an airy base are all dominant features of the new Ark Modular Sofa. The design plays with curves and volume, making Ark appear almost as a sofa built solely from cushions and alluding to its soft, welcoming expression.

Ark Modular Sofa 3 seater

Ark Modular Sofa 3 seater

Ark Modular Sofa is a marriage of unparalleled comfort, modular flexibility and contemporary elegance. The sofa comes in several different modules, including a one-seater armchair, all elevated by their minimalist yet organic lines, giving the design a distinctly soft appearance. Designed for modern spaces where flexibility and timelessness are in high demand, Ark's modularity combined with its long-lasting materials and expression accommodate exactly that.

A recurring element in the design, Ark gets its name from the Danish word for arches. The sofa radiates relaxation and comfort, its construction seemingly divided into smaller, pillowed sections. Each section is distinguished by the subdued crescents of the cushions which, besides their soft visual expression, gesticulate at the equally soft seating comfort. This voluminous composition contributes to Ark's embracing appeal, while the simultaneously simplistic design draws on references from the classic minimalism characterized by Danish design. The slight space between the seat and floor lends airiness to the design, while also presenting a practical advantage, providing access for easy cleaning below the sofa. Designer Simon Legald elaborates:

“The goal was to design a sofa that was practical, comfortable and flexible while still adhering to a light, simplistic idiom.”

The flexibility of Ark is emphasized in its modular construction comprising four different modular units. Providing the possibility to choose between two end modules, a center module, a corner module or a one-seater, Ark can be customized to any need or space. A wide range of high-quality upholstery options offer further possibilities for personal expression.

Ark is built using a spring system and a combination of high-density foam, low-density foam and wadding, providing maximum comfort. The frame rests on slender legs made from powder-coated steel, elegantly lifting the sofa from the ground, making the design appear airy and light.

Ark's embracing silhouette and sophisticated expression makes it an obvious choice for furnishings in residential and commercial settings alike.

Ark Modular Sofa 3 seater
Ark Pouf

Ark Modular Sofa 2 seater

Rar Sofa 2 seater
Rar Armchair

Rar Sofa 2 seater

RAR

With its easy-to-like silhouette and impeccable comfort, Rar is an uncomplicated sofa collection that will adapt seamlessly to many interiors and tastes. Capturing the essence of its inviting nature, Rar takes its name from the Danish word for pleasant. Comprising an armchair, a 2-seater sofa, and a spacious 3-seater sofa, this collection embodies a humble design language that seamlessly integrates into any space.

Redo Modular Sofa

REDO

Redo presents a fresh, clever approach to the well-known modular sofas, with a design that is extraordinarily uncomplicated. Built on a flexible modular system, the design allows the modules to be combined in any desired configuration. The corner module serves as a right armrest, left armrest, and corner piece, enabling multiple iterations of the same sofa.

Rope Modular Sofa

Rope Modular Sofa with three modules

Rope Modular Sofa with five modules and Rope Pouf

Rope is a stringent modular sofa with clean lines and softly rounded corners. The simplistic design puts an emphasis on flexibility and comfort, and combines traditional upholstery techniques with a timeless expression. Rope combines minimalistic features with a deep, spacious seat and an understated, elegant backrest. Designed to accommodate the need for ultra comfortable lounge furniture, Rope prompts you to relax and stretch out for hours on end, without compromising on the aesthetic appeal.

Simultaneously timeless and contemporary, Rope draws references from the classic lounge furniture of its Danish design heritage, while accommodating the many needs of present-day life. Inspired by the timeless details of classic design, Rope is adorned with a distinctive piping that elegantly frames the edges throughout the sofa, while the flexibility of the modular construction embraces the diversity of needs of modern lounge environments.

The Rope Modular Sofa's composition is constructed with pocket springs and foam for unparalleled comfort. The designer, Hans Hornemann, elaborates:

”In order to achieve the highest levels of comfort, we have built the sofa with pocket springs and foam. The foam ensures soft seating that shapes itself according to body contours. The pocket springs, which are most often used in beds, provide durability and support that feels more alive, because you don't sink too far in.”

Available with a variety of different modules ranging from narrow to wide, with and without armrests, with a chaise longue and without, Rope can truly be customized to suit both the grandest of hotel lobbies and the smallest apartments of urban life. The versatile sofa collection comprises precisely 14 different modules and can be tailored to any setting with hundreds of textiles, leathers and colors to choose between.

Rope Modular Sofa with various modules

Sum Modular Sofa with Black aluminum legs

BIT

Crafted from 100% recycled plastic, Bit Stool is a circular and versatile design with countless possibilities for any space.

Bit Stool in different variations

Bit Stool Stack in White/White

Bit Stool's straightforward, utilitarian look contrasts with the pixelated surface made up of small bits of 100% recycled plastic.

For the production of Bit, post-industrial and post-household plastic waste is sorted, granulated into small fragments and melted in a special mold. This is a particular process where the plastic fragments are heated to a 120°C melting point, making it possible to repeatedly reuse and reheat the material without altering its properties. The result is a circular stool design with a distinctive thickness and composition. The plastic granulate is sorted into different colors, and due to its origin and production method, every Bit Stool is a bit unique.

Inspired by clear-cut shapes such as monoliths and columns, designer Simon Legald's take on the stool is both bold and multifunctional. Legald elaborates:

"Bit Stool is a great example of how to utilize already existing materials for a more circular way of production. The unique thing about Bit Stool, besides its responsible material composition, is its ability to appear as a sculpture as well as a stool, a side table or a pedestal."

A versatile furniture piece, Bit Stool takes on lots of different uses and can be adapted in many different ways. Use Bit as a pedestal for a floral arrangement, a side table for a favorite table lamp, as impromptu seating for an unexpected dinner guest, or even as a small table for shampoo in the shower. Withstanding temperatures from -10°C to +50°C, Bit Stool can also be used outdoors, offering a diversity of options for use in the garden, balcony or patio.

Bit comes in three different pillar-inspired shapes and ten captivating color combinations. Choose the vivacious colored versions to highlight the striking design and distinctive materials or the elegantly demure black or white Bit Stools to subtly blend in with the existing decor. Add some panache to the store window, lobby or hotel room or invite Bit into your home to brighten up your living room, balcony, or the children's bedroom. With its playful shape and fascinating array of hues, Bit Stool will bring a sense of personality to any setting.

HIDE

Hide Storage Pouf is a versatile, multifunctional piece of furniture that is a bit more resourceful. At the heart of the Hide Storage Pouf is its material composition. Crafted from PET felt, a remarkable fabric made from postconsumer plastic bottles that are extruded into fine polyester fibers, which are then carefully compressed to create a durable and soft felt material.

Scala Table H75 Ø70 cm with Black oak tabletop

SCALA

Scala Table is a straightforward design with an emphasis on the column's architectural features. Scala's characteristic frame is composed of four columns that change in expression depending on the vantage point. The sturdy base is fashioned from solid steel while the round tabletop is available in either oak veneer, marble or stainless steel in a variety of sizes.

SLICE

Great attention has been paid to the details of the Slice collection, a series of tables characterized by timeless harmony. Slice is crafted from natural, high-quality materials that exude warmth and exclusiveness. The durability of the materials makes Slice suitable for homes, offices and restaurants that need a design that can withstand both frequent and long-term use.

UNION

Union offers a place for meals, work, studying, conversations and get-togethers. A gathering place for all kinds of activities, Union accommodates them all. A timeless table collection in a minimalistic, monochrome design with subtle brass details, the tabletop is made from nano-coated laminate while an airy steel design constitutes the base. With fifteen tables of varying shapes, heights and sizes, Union offers a wealth of options for all spaces.

Pine Table Small in Dark Grey

Pine Table Small in Pine

PINE

The choice of pinewood sets the tone for the design of the Pine Tables. The tables gain a pleasing organic quality from the wood's distinctive grain, and the overlooked wood species is given new life in a playful form. The collection features tables in two sizes and a series of finishes. Choose between natural lacquer or a range of stained pine variants in Dark Grey, Dark Blue or the new, bold colors of Rose and Light Green.

Turn Table in White, Black and Grey

TURN

Turn Table is a small yet functional table with a steel base and a wood or marble tabletop. The name refers to the rotational movement used to adjust the height of its round tabletop, gently raising it up from its bell-shaped steel base. With a minimum height of 41.5 cm and a maximum height of 66.5 cm, this small table can be easily adjusted to suits its existing surroundings.

Turn Table Marble in White and Black

Turn Table Marble in White and Black

Edge Table Small

Edge Table Small
Edge Table Large

EDGE

Crafted from 100% travertine, Edge is a minimalistic design with a straightforward construction. To minimize unnecessary waste, Edge is designed to utilize the way the travertine material is sourced. The natural stone is quarried, then cut into slabs of different sizes. These slabs of varying sizes are then assembled in a simple, geometric construction, making the most of the material. Edge Coffee Table is available in two sizes.

Lunar Coffee Table H45 cm with Black aluminum legs and Black oak tabletop

Lunar Coffee Table H45 Ø60 cm with aluminum legs and oak tabletop
Lunar Coffee Table H40 Ø70 cm with aluminum legs and oak tabletop

LUNAR

Referring to its full-moon silhouette, the graceful Lunar Table is available in four beautiful surfaces made from gorgeous marble and warm, stately oak. With height options of 40 or 45 cm, the Lunar tables can be arranged either individually or in a cluster to create a unique table decor, making the tables both a sophisticated and functional choice for any office lobby or soft open living space.

SCALA

A TRIBUTE TO THE COLUMN'S ARCHITECTURAL SIGNIFICANCE

Grow Table Small in Black oak

Grow Table oak in various sizes

GROW

Grow Coffee Table is crafted from solid oak in a finely balanced design with references to classic Danish shaker style. Grow gets its name from the distinctive, smooth transition from tabletop to legs, which gives the impression that the legs are growing out of the tabletop. With its simple silhouette and refined details, Grow alludes to the luxury of simplicity.

Solid Table White

Solid Table White

SOLID

Solid is a minimalist coffee table made from just two components: A natural, solid ash base and an elegant marble tabletop, available in three color-coordinated options. The result is a timeless and sturdy coffee table with a simple design stripped of unnecessary details.

Solid Table Coffee

Solid Table Black

SCULP

Ding Table with Black oak legs and Smoke glass tabletop

Ding Table with oak legs and glass tabletop

DING

German design duo Rudolph Schelling Webermann have created a simple coffee table that is assembled without the help of screws and tools. Ding Table consists quite simply of three legs made from oak. When put together they constitute a sculptural knot that works as the base for an exclusive glass tabletop.

Stock Table in Black

Stock Table in various colors

STOCK

Using the most elementary steel stock parts as their starting point, MSDS Studio have created Stock, an architectural little side table. Stock presents metal in a raw and deconstructed way while retaining a delicate, rigid quality. The table's unconventional leg arrangement emphasizes the material's strength and provides an interesting, sculptural composition of elements.

PLANK

HONEST SIMPLICITY MEETS FUNCTIONAL DESIGN

Kabino Sideboard in White

Kabino Dresser with five drawers in White

Kabino Bedside Table in Grey

KABINO

The Kabino series consists of two different sideboards, a bedside table and two dressers with five and six drawers, respectively. The many small details of the design help create a visual break in the uniform surface of the front, while a frame of ash softens the industrial expression, adding warmth and exclusivity.

One Step Up High

ONE STEP UP

Francis Cayouette's One Step Up shelving unit is inspired by the form and function of a ladder. The natural ash wood and industrial metal shelves create an interesting dynamic. Ideal for storage, it can be used alone or as part of a shelving system comprising several units. One Step Up is flexible and can easily be folded together and moved from one place to another.

JET

An experiment with compositions of surfaces, spaciousness and texture has led to the design of Jet, a light aluminum shelf with a spacious design and a clear-cut industrial silhouette. An asymmetric relationship between a horizontal and vertical surface creates the Jet shelf's architectural design and comes together as an attractive platform for storage and display.

BEDS

NOTCH

Notch Bed Frame

NOTCH

Crafted with meticulous attention to detail, Notch Bed Frame is expertly made using 100% solid pine wood planks, showcasing the exceptional beauty and durability of the natural material. Inspired by the traditional notching technique, where one plank is inserted into another to form the joints of the furniture piece, the bed frame achieves both structural integrity and stunning decorative details at the corners.

OUTDOOR

VIG

BIT

VIG

The versatile Vig collection offers a range of stackable outdoor furniture, enabling endless possibilities for creating inviting and flexible seating areas.

Vig Chair Robinia in Black
Vig Table Robinia 90x200 cm in Black

Vig Chair Robinia in Black

From comfortable dining chairs to inviting lounge chairs, elegant chaise longues, versatile benches, stylish barstools, and adaptable tables in various sizes, Vig offers a comprehensive selection that will integrate seamlessly with natural landscapes and urban environments alike.

The design emerged from a desire for a sturdy structure with an airy and welcoming expression. The seamless union of the legs and seat presents a spacious composition that invites you to indulge in ultimate comfort. With optional armrests boasting a distinctly alluring design, Vig embraces you with open arms, exuding warmth and hospitality. This unique detail adds an approachable and friendly feeling to the design.

Every curve and contour of the design is an homage to the organic, flowing forms and silhouettes of nature. Soft, rounded edges evoke a sense of natural harmony, making the collection's intended outdoor usage apparent, the design fashioned to fit gracefully into a diversity of outside settings.

Made from double powder coated steel for enhanced durability, Vig is built to withstand the rigors of outdoor use while maintaining its pristine appearance. Each piece in the collection has been thoughtfully designed to ensure resilience and longevity, encouraging years of good use in all weather conditions. In addition, a distinctive feature of the Vig collection is the integration of Robinia (Black Locust) wood, featured on the collection's tables and available as an optional choice for the seating range. Robinia, or Black Locust, is renowned for its exceptional strength, durability, weather resistance and remarkable resistance to decay, requiring minimal maintenance while maintaining its natural beauty. The combination of steel and Robinia offers an elegant blend of materials, further enhancing the collection's aesthetic appeal.

"The Vig collection unites visual appeal, functionality and durability," says designer, Simon Legald. "By incorporating Robinia wood and double powder coated steel, we have ensured that each piece in the Vig collection offers exceptional durability and resistance to outdoor elements."

ALLEZ

From small balconies to grand patios and cozy garden nooks, the Allez Chair and Table duo are the perfect companions for outdoor environments.

Inspired by French bistro culture, Allez gives a contemporary look and feel to the traditional café chair's soft idiom and constructive strength in terms of design, functionality and sustainability. The result is a flexible design that still nods to a bygone era but has now been adapted to suit even more environments and user scenarios.

Based on an innovative component built construction, the Allez Chair can be customized to match any desired expression or complement any setting. The Allez components are available in several variants, allowing users to put together a design to suit their personal style and needs.

With a variety of seats to choose between, Allez can obtain a diversity of different expressions. From a French bistro look evoked by an enduring molded polypropylene wicker seat, to a clean, minimalistic appearance induced by a monotone polyamide seat featuring a discreet hole leading rainwater away, Allez offers the possibility to create personalized spaces for outdoor living. For increased comfort, the chair is available to order with color-coordinated seat upholstery in OEKO-TEX-certified outdoor upholstery with the ability to withstand the wear and tear of outdoor use.

Allez Chair is available in five timeless tones, each reflecting the stark and beautiful Nordic nature. A balanced and neutral color palette of park green, grey and warm grey, as well as black and white, allows the design to humbly fit into larger contexts and outdoor environments. The color scale supports the desire for a design that will stay relevant for many generations to come.

A trusted companion to its namesake chair, the Allez Table is characterized by sleek, elegant lines from all vantage points and a cylindrical cast iron 3 or 4-legged pedestal base discretely shaped to mimic the curvature of the Allez Chair's legs. Adjustable feet have been incorporated in the design, making it possible to stabilize it on uneven surfaces.

The Allez Table offers flexibility with the choice of either circular or square tabletops made from a broad assortment of materials. Inspired by traditional café tables, Allez includes two tabletop options that are ideal for outdoor use: Timeless marble or lightweight, 4mm thin solid stainless steel.

The many possible combinations allow for putting together a customized Allez ensemble that will constitute the setting for many memorable outdoor moments.
